---

## Education

**Michigan State University - East Lansing, MI**

*B.S. in Computer Science*

GPA: 3.49

*Minor in Entrepreneurship and Innovation*

**Sept 2016 - May 2020**

**Boston College High School - Boston, MA**

*Diploma*

GPA: 3.43

**Sept 2012 - May 2016**

## Experience

**Software Development Intern Humana - Louisville, KY**

**May 2019 - Current**

- Developing Python Flask API for a full stack application that will serve as project estimation management system for architects.
- Working with Azure pipelines and Google Cloud platform app engine to facilitate efficient and reliable continuous deployment.
- Placing heavy emphasis on Test Driven Development to write clean code that works.

**Software Development Intern at 2Is inc. - Walpole, MA**

**May 2018 - August 2019**

- Used Test Driven Development technique to develop an SAP Interface with Northrop Grumman
- Wrote back-end code using Common Lisp
- Made installers for the 2Is Analytic Platform using Inno Setup and Pascal
- Did QA on many projects by rewriting and creating new unit tests in Common Lisp
- Wrote Lisp and Microsoft SQL to setup a SQL server for data analytics

**Front End Development Intern at Getfused - Boston, MA**

**May 2017 - Aug 2017**

- I helped build sites for Wynn Casino, and other small local businesses
- I wrapped sites using CSS, HTML, and JavaScript
- Styled pages to be fully responsive (i.e. desktop, tablet, mobile, and print version)
- Made small design decisions when styling something that is not designed in the comps

## Technical Skills

- Proficient in Python, Java, Common Lisp, C++, CSS, and HTML
- My computer science coursework has consisted of Algorithm Engineering, Database Systems, Software Design, Operating Systems, Data Structures and Algorithms, Computer Organization and architecture, Discrete Structures, and Intro to Programming I and II
- I have spent some of my free time working with Linux on my personal laptop which has taught me about using a Bash shell and the Linux environment in general

## Projects

- I made a python module for re-naming and re-dating image files for family photos
- I used python to make a page screenshotter script that takes a URL and returns screenshots of all pages on the site using web scraping techniques
- I have made a Caesar Cypher, Password Cracker, and Baker's Game using Python
- I have made many websites on my own as a Web developer using static site generators and raw CSS/HTML
- Created programs such as the Snake game, Hangman, an AI chatbot, and an adaptation of MS Paint using Java
